

As a result of the Foundations program, facilitators are better equipped to:

Practice and experiment with a broader set of facilitation tools and techniques

Heighten engagement levels in their sessions

Seek feedback and continue to advance

Being a subject matter expert doesn't prepare someone to lead a workshop or facilitate a project meeting.

Success requires a Shift in mindset from expert/trainer to guide/facilitator.

Foundations in Facilitation™ introduces the novice facilitator to the ABC's of facilitation based on the Three Domains of Mastery™ model – Own the Content, Manage the Room and Animate the Experience.

An intensive one-day program, the emphasis of Foundations is on application and practice. Using practical techniques and tools to increase interaction, participation and discussion. Participants benefit from direct, personalized feedback.

Topics include discovering facilitation styles and strengths using the Five Personas Benchmark™ tool, using voice and body language, directing activities, leading discussions and debriefs, managing process, and handling awkward situations.
